

SureShade® ATF-SG “Silent Glide” Shade

ATF-SG “Silent Glide” shade is SureShade’s next-generation automated retractable sunshade system with “silent glide” technology producing **85% less noise** than the current SureShade ATF electric shade.

What’s changing...

New boat models equipped with factory-installed SureShade ATF automated boat shades will now begin to utilize the new ATF-SG silent glide shade.

When extending or retracting the shade, SureShade ATF-SG produces sound that is virtually unnoticeable to the human ear.

New ATF-SG systems also operate with 80% power requirement reduction - consisting of a single power source which draws 3 AMPS @ 12VDC (single 5AMP fuse) rather than drawing from two power sources that combine at 14 AMPS @ 12VDC (single 15AMP fuse & another 5AMP Fuse) with original system. The new ATF-SG system also has the ability to operate at 10.5VDC.

What’s not changing...

ATF-SG has the same exact look and feel of the current ATF shade as all enhancements are internal to the drive system – it is simply much quieter.

User operation of the shade works the same way as the current ATF shade, with comparable performance and functionality.

Timeframe for availability...

ATF-SG availability is a phased roll-out and may vary by builder and boat model. Dealers can expect delivery of ATF-SG factory-equipped boat models starting in spring 2018.

Key Benefits of SureShade ATF-SG Silent Glide

- Silent shade operation – 85% less noise
- 80% power requirement reduction
- Same look & feel – seamless OEM transition at factory or upgrade for existing clients

Upgrading to ATF-SG Silent Glide Shade

Existing boat models equipped with SureShade ATF automated shade can easily be upgraded to the new ATF-SG silent glide.

Upgrades will require the purchase of a new controller, wiring harness and both actuators. Installation is a direct fit with no other modifications needed.

For boat models not previously factory-equipped, SureShade ATF-SG Silent Glide shade is also available as an aftermarket installation.

Dealers can earn both sales & installation service revenue by upgrading existing clients to ATF-SG Silent Glide or when selling new aftermarket installations of SureShade.
